Your Situation Map

Make the right step easier to take.

Pick one task that keeps slipping. Then use the four elements from Angela Duckworth's *Situated* to find one change you can test for two weeks. About fifteen minutes.

START HERE

The task that keeps slipping

What is it, when should it happen, and what usually gets in the way?

RING 1 · CLOSEST TO YOU

Set up your space

What could change about when, where, or with what tools the task happens? Block the time, move the distraction, put the template where the work starts.

RING 2

Pick your peers

Who would raise your standard on this? Name one person or group, and what you would ask of them.

RING 3

Attract mentors

Who is a few steps ahead of you? Write the one specific question you would bring them.

RING 4 · AROUND EVERYONE

Choose your culture

What shared norm would make this the obvious thing to do? Where will the team see it?

YOUR TEST

My one change for the next two weeks

Start date

Check-in date

Keep, change, or drop?

Pocket card. Cut along the dashed line and keep it where the task happens.

SITUATION MAP

Space, peers, mentors, culture
