StrideForward

CAPABILITIES OVERVIEW · 2026

Find the real problem. *Build the real fix.*

Strategy, program design, and hands-on support for small businesses, nonprofits, and learning ventures.

Gina Wilt, EdD, MBA · hello@strideforward.world

WHO WE WORK WITH

Small teams with *meaningful ambitions.*

Owners of small businesses, leaders of small nonprofits and community organizations, school and learning ventures, and the people who fund or partner with them.

YOU MIGHT BE HERE IF

You keep solving symptoms.

You know something needs to change, and the fixes so far have not held.

YOU MIGHT BE HERE IF

You have expertise, not yet a program.

A service idea or a grant deliverable has to become something people can use.

YOU MIGHT BE HERE IF

Your team needs a shared practice.

Not another one-off training: learning that fits real schedules and shows up in the work.

SOUND FAMILIAR?

Four places small teams *get stuck.*

"I know something needs to change, but I keep solving symptoms."

STRATEGY AND POSITIONING

We help you name the real problem and the people it affects, then decide what deserves your time first.

"I have expertise people would pay for. I do not have a program."

PROGRAM AND SERVICE DESIGN

We turn what you know into a program, workshop series, or service, then pilot it with a small first group.

"Our nonprofit needs partners and funders, and outreach keeps slipping."

PARTNERSHIP DEVELOPMENT

We map the organizations that fit, shape the offer, and prepare the materials for focused conversations.

"The plan is clear. Nobody has time to do it."

HANDS-ON IMPLEMENTATION

We take on defined pieces of the work alongside your team, from developing materials to coordinating a launch.

THREE KINDS OF HELP

One way to start: *a thirty-minute call.*

01 · CONSULTING AND STRATEGY

Strategy and positioning for what comes next.

What you get: The real problem named in plain language, the audience understood, partners and funders mapped, and a short plan you can act on this quarter.

02 · PROGRAM DESIGN AND DEVELOPMENT

Turn what you know into something people can use.

What you get: Program structure, materials, a delivery plan, a small pilot, and hands-on help getting it into people's hands.

03 · PROFESSIONAL LEARNING

Learning designed for your team, not a generic audience.

What you get: A learning series or coaching structure with clear goals, facilitation materials, and a way to see what changed in practice.

Building your own skills rather than hiring help? NextReady Studio, a sister brand, runs workshops and coaching: nextready.studio

HOW THE WORK MOVES

Test it small. *Build it right.*

A focused project or an ongoing working partnership. Either way, we agree on the problem, the scope, and what useful progress looks like before the work begins.

01

Find the real problem.

Listen, ask better questions, and look at what is already working.

> You bring the situation and the people who know it.

02

Test it small.

Make the idea tangible and test assumptions before a bigger commitment.

> You try one thing with a few real people.

03

Build it right.

Define the offer, build the pieces, and refine from what happened.

> You review drafts and make the calls.

04

Hand it over working.

Materials, decisions, and next steps your team can run.

> You own it, with a plan to keep improving.

PROJECT SNAPSHOT 1 OF 3

A COLLEGE OF EDUCATION AT A LARGE PUBLIC UNIVERSITY

Making a workforce portfolio legible to outside buyers.

SITUATION	Learning, credentials, consulting, research, and events had grown up separately. Districts, employers, and partners could not see how the pieces fit or where to start.
WHAT WE BUILT	A connected offering and capability strategy: audience-specific offers, pathways between them, and the market intelligence and financial logic behind each.
WHAT CHANGED	One portfolio that external partners could read, with clear entry points and a shared language across teams.

PROJECT SNAPSHOT 2 OF 3

HIKI EDUCATION · HAWAIʻI

Positioning place-based professional learning for schools.

> “She moved us from internal strategy into active market engagement. We went from explaining what we do to showing our value.”
>
> Kalina Kai Mead, Director, HIKI Education, Pacific American Foundation

SITUATION	Strong, culturally grounded programs and a fishpond site, but no clear way for principals and district leaders to understand or contract the professional learning.
WHAT WE BUILT	A school-buyer strategy, a soft-launch website, professional-learning packages, a scoping-call-to-proposal path, an operating playbook, and pitch materials for funders and partners.
WHAT CHANGED	School leaders can now see what is offered, who it is for, and how to begin. The team has a playbook to run it.

PROJECT SNAPSHOT 3 OF 3

AN EARLY-LEARNING MEDIA STARTUP

Building the evidence base and partnership plan for a new product.

SITUATION	A founder with a product for four- to six-year-olds and strong instincts, but no structured evidence or partnership approach to bring to schools and families.
WHAT WE BUILT	A research brief connecting the product to learning science, a pilot plan across parents, homeschool, and classroom settings, and a partnership development approach.
WHAT CHANGED	Product decisions now have a Now, Next, Later logic tied to evidence, and partner conversations start from a clear story.

TYPICAL ENGAGEMENTS

A clear scope. *A useful outcome.*

ENGAGEMENT	HOW LONG	WHAT YOU GET	HOW PRICING WORKS
Discovery call	30 minutes	The real problem named, a recommendation on which kind of help fits, and one clear next step.	No cost.
Focused project	Usually 4 to 8 weeks	One defined piece of work: a positioning and offer plan, a partner map with outreach materials, or a program outline.	Fixed fee, set in the scope note.
Design and pilot	Usually 2 to 4 months, including the pilot	Program structure, materials, a first group, and a revision plan based on what happened.	Fixed fee by phase.
Working partnership	Ongoing, reviewed every quarter	Monthly priorities, regular check-ins, and hands-on development and coordination.	Monthly fee, set by scope.
Professional learning	One session to a year-long series	Facilitated sessions, coaching, or induction support, with materials and follow-through.	Per session or per series.

Every engagement starts with a discovery call and a one-page scope note. Durations are typical ranges; the scope note sets the real timeline and fee before you commit.

WHAT A FIRST CALL COVERS

Thirty minutes. No preparation. *A next step either way.*

01

Pick a time that works.

Gina's live calendar, shown in your time zone. Three short questions when you book: your organization, which kind of help, and what you are trying to make possible.

02

Talk it through.

You describe the situation. We find the real problem together, using the four places small teams get stuck.

03

Leave with one clear next step.

If it is a fit, a one-page scope note, written as a letter, within two business days. If it is not, a recommendation you can use anyway.

Gina Wilt · EdD, MBA

ABOUT GINA

A thinking partner. *A working partner.*

Most of Gina's career has lived at the intersection of education, leadership, and program design: developing new programs and initiatives, shaping strategy for growing organizations, and designing learning for the people doing the work.

Her doctorate in education and MBA bring together two sides of the work: how people learn and grow, and an operating model that is practical and sustainable.

StrideForward is the consulting work of GMW Group LLC. Sister brands: NextReady Studio (workshops and coaching) and Thrive Vibes (community and learning travel).

NEXT STEP

What are you trying *to make possible?*

Book a thirty-minute discovery call with Gina. No preparation needed.
