StrideForward

CAPABILITIES OVERVIEW · 2026

Find the real problem. *Build the real fix.*

Strategy, program design, human-centered AI workflows, and hands-on support for small businesses, nonprofits, and education ventures.

Gina Wilt, EdD, MBA · hello@strideforward.world

WHO WE WORK WITH

Small teams with *meaningful ambitions.*

Most have a small team, or no team, and need work done rather than a report.

Entrepreneurs and small business owners
Launching an offer, growing a service, or getting time back from repeat work.

Small nonprofits and community organizations
Building programs, partners, and funders with a lean team.

Education startups and learning ventures
Bringing a product or program to schools, families, or funders.

FOUR PLACES SMALL TEAMS GET STUCK

“I know something needs to change, but I keep solving symptoms.”

We help you name the real problem and the people it affects, then decide what deserves your time first.

MARKET RESEARCH AND POSITIONING

“I have expertise people would pay for. I do not have a program.”

We turn what you know into a program, workshop series, or service people can use, then pilot it with a small first group.

PROGRAM DEVELOPMENT

“Our nonprofit needs partners and funders, and outreach keeps slipping.”

We map the organizations that fit, shape the offer, and prepare the materials for focused conversations.

BUSINESS DEVELOPMENT AND SALES

“The plan is clear. Nobody has time to do it.”

We take on defined pieces of the work alongside your team, and set up AI workflows that take repeat tasks off everyone’s plate.

AI WORKFLOWS AND HANDS-ON HELP

WHAT WE DO

Six kinds of help, *with hands-on work built in.*

Each one helps you clarify what comes next, build what is needed, connect with the right people, or deliver the work. Every service includes hands-on help, plus AI workflows where they save your team time.

CLARIFY

Market research and positioning

Find out who buys, who uses, and who funds, what each one needs, and where you fit, before you launch or reprice.

YOU LEAVE WITH

A clear picture of your market and a position you can explain in one sentence.

CLARIFY

Customer experience design

Map each step from your customer's side, find where people drop off, and redesign the moments that matter most.

YOU LEAVE WITH

A blueprint of the experience, the fixes in order, and the materials to make them.

BUILD

Program development

Turn expertise, a grant deliverable, or an early idea into a program people can use, then test it with a small first group.

YOU LEAVE WITH

A usable program structure, delivery materials, and a plan to test and improve.

BUILD

New revenue services and products

Shape a new service, product, or revenue line and test it with real customers before you commit.

YOU LEAVE WITH

A defined offer, the numbers behind it, and a test plan with real customers.

CONNECT

Business development and sales

Find the partners and buyers that fit, shape an offer they can say yes to, and run the outreach with you.

YOU LEAVE WITH

A prioritized pipeline, the materials to work it, and a sales rhythm your team can keep.

DELIVER

AI workflows and automation

Set up AI assistants, scheduled briefs, and follow-up systems that take repeat work off your team, with people making the calls.

YOU LEAVE WITH

Workflows running in your accounts, documented, and a team that knows how to use them.

HUMAN-CENTERED AI WORKFLOWS

Put AI to work. *Keep your people at the center.*

Workflows for the work your team repeats every week, set up in the tools you already use and documented in plain language. AI takes on the repeat work. Your team makes the calls.

MARKETING

Your voice, written down once.

A voice and brand guide your AI assistant follows, so drafts start out sounding like you.

SALES AND BUSINESS DEVELOPMENT

Follow-up that happens on time.

Prospect research, outreach and reply drafts, and call prep, with a person approving what goes out.

PRODUCTIVITY AND PLANNING

A brief before the week starts.

Scheduled briefs from your email, calendar, and task board, plus meeting notes turned into to-dos.

TEAM HUBS

One place for how you work.

Your offers, brand, processes, and decisions, kept current, so people and AI tools work from the same facts.

TEAM TRAINING AND LEARNING

Your team learns it with their own work.

Short, hands-on sessions with real tasks, plus simple guidelines for when to check AI's work.

GUARDRAILS

Rules written in from the start.

What each workflow can use, what it must never share, and which steps need a person.

EVERY SETUP FOLLOWS THE SAME THREE STEPS

01
Start with the people and the work.

Where your team's time goes, and two or three workflows to test first.

02
People make the calls.

AI drafts, sorts, and reminds. A person reviews anything that reaches a customer, partner, or funder.

03
Hand it over working.

Set up in your accounts, documented, and your team trained to run and change it.

FOR EDUCATION STARTUPS AND LEARNING VENTURES

From a product learners love *to one schools can buy.*

Schools, districts, and funders want evidence that it works, a pilot they can trust, and a plan for teachers to use it. We help small education teams build those pieces and the partnerships behind them.

EVIDENCE

A clear case for why it works.

A research brief and logic model at the “demonstrates a rationale” level, the entry level of the four evidence tiers under the Every Student Succeeds Act (ESSA).

PILOTS

Results a school can use.

Who takes part, what to measure, and how results come back to the school, planned before the first class starts.

THE BUYER MAP

Who uses, who decides, who pays.

Teachers, principals, districts or families, and funders each need a different message and a different first step.

BUYER-READY MATERIALS

Answers ready before they ask.

Evidence summary, pilot results, pricing, implementation plan, and privacy and accessibility documents in one packet.

TEACHER ADOPTION

Still in use in month three.

Onboarding, short professional learning, and coaching follow-through that fit your product into a real week.

PARTNERSHIPS AND SALES

Partners with a reason to say yes.

The networks, nonprofits, and funders that fit, an offer shaped for them, and help running the outreach.

HOW WE WORK

A defined project, *or a partner inside your team.*

Every engagement starts the same way: a thirty-minute call with Gina, then a one-page scope note that sets the work, the timeline, and the fee before you commit.

01 · PROJECT

One defined piece of work, start to finish.

WHO IT IS FOR	Teams with a clear need and a date that matters: a launch, a board meeting, a grant deadline.
HOW IT WORKS	A fixed scope, a timeline, and a fixed fee, all set in the scope note. Most projects run four to eight weeks.
YOU LEAVE WITH	The finished work and the materials to run it, in your hands.

02 · FRACTIONAL (EMBEDDED)

A senior partner inside your team, a few hours a week.

WHO IT IS FOR	Owners and leaders who need ongoing help with growth, programs, or operations before they are ready to hire for it.
HOW IT WORKS	Agreed monthly priorities, set hours, regular check-ins, and a review every quarter, for a monthly fee set by scope.
YOU LEAVE WITH	Work that moves every week, plus the systems and materials to keep it moving.

01

Find the starting point.

Listen, ask better questions, and look at what is already working.

02

Shape a workable solution.

Make the idea tangible, build the pieces, and test the assumptions before a bigger rollout.

03

Put it into practice.

Support delivery, learn from what happens, and leave you with materials and next steps.

A COLLEGE OF EDUCATION AT A LARGE PUBLIC UNIVERSITY

Making a workforce portfolio legible to outside buyers.

SITUATION

Learning, credentials, consulting, research, and events had grown up separately. Districts, employers, and partners could not see how the pieces fit or where to start.

WHAT WE BUILT

A connected offering and capability strategy: audience-specific offers, pathways between them, and the market intelligence and financial logic behind each.

WHAT CHANGED

One portfolio that external partners could read, with clear entry points and a shared language across teams.

HIKI EDUCATION · HAWAIʻI

Positioning place-based professional learning for schools.

> *"She moved us from internal strategy into active market engagement. We went from explaining what we do to showing our value."*
>
> Kalina Kai Mead, Director, HIKI Education, Pacific American Foundation

SITUATION

Strong, culturally grounded programs and a fishpond site, but no clear way for principals and district leaders to understand or contract the professional learning.

WHAT WE BUILT

A school-buyer strategy, a soft-launch website, professional-learning packages, a scoping-call-to-proposal path, an operating playbook, and pitch materials for funders and partners.

WHAT CHANGED

School leaders can now see what is offered, who it is for, and how to begin. The team has a playbook to run it.

AN EARLY-LEARNING MEDIA STARTUP

Building the evidence base and partnership plan for a new product.

SITUATION

A founder with a product for four- to six-year-olds and strong instincts, but no structured evidence or partnership approach to bring to schools and families.

WHAT WE BUILT

A research brief connecting the product to learning science, a pilot plan across parents, homeschool, and classroom settings, and a partnership development approach.

WHAT CHANGED

Product decisions now have a Now, Next, Later logic tied to evidence, and partner conversations start from a clear story.

TYPICAL ENGAGEMENTS

A clear scope. *A useful outcome.*

ENGAGEMENT	HOW LONG	WHAT YOU GET	HOW PRICING WORKS
Discovery call	30 minutes	The real problem named, a recommendation on which kind of help fits, and one clear next step.	No cost.
Focused project	Usually 4 to 8 weeks	One defined piece of work: a market and positioning plan, a new offer with a test plan, a customer experience blueprint, a partner pipeline with outreach materials, a program outline, or a first set of AI workflows.	Fixed fee, set in the scope note before work begins.
Design and pilot	Usually 2 to 4 months, including the pilot	Program structure, participant and facilitator materials, a first group, and a revision plan based on what happened.	Fixed fee by phase: design, pilot, revise.
Fractional (embedded)	Ongoing, reviewed every quarter	Set hours inside your team each month on agreed priorities: the pipeline, a program, or the systems behind them, with regular check-ins.	Monthly fee, set by scope.
Professional learning	One session to a year-long series	Facilitated sessions, coaching, or induction support, with materials and follow-through built around the practice you want to see.	Per session or per series.

Durations are typical ranges, not promises; the scope note sets the real timeline and fee before you commit. See an example: strideforward.world/scope-note-example

Gina Wilt · EdD, MBA

WHY WORK WITH GINA

A thinking partner. *A working partner.*

Most of Gina's career has been spent inside the work: designing programs, selling them, and running the systems behind them. Her doctorate in education and MBA bring together how people learn and grow, and an operating model that is practical and sustainable.

- More than twenty years building learning programs and education ventures, from the special education classroom and instructional coaching to teacher-preparation faculty.
- Led curriculum as an associate vice president for an online university.
- Directed a market-facing professional learning business inside a large public university, building about $585,000 in partnerships and sales with school systems and national education organizations.
- Nine months as business architect for HIKI Education in Hawai'i, and three months shaping a dual-enrollment strategy for an arts-and-humanities education organization.
- Runs her own businesses on the AI workflows and systems she sets up for clients.

StrideForward is the consulting work of GMW Group LLC. Sister brands: NextReady Studio (workshops and coaching) and Thrive Vibes (entrepreneurial experiences, community, and learning travel).

NEXT STEP

What are you trying *to make possible?*

Book a thirty-minute discovery call with Gina. No preparation needed, and a next step either way.

01
Pick a time that works.
Gina's live calendar, Tuesday to Thursday, shown in your time zone.

02
Talk it through.
You bring the situation. We find the real problem together.

03
Leave with one clear next step.
If it is a fit, a one-page scope note within two business days. If not, a recommendation you can use anyway.
